

We are a newly established Flux-cored wire manufacturer specialized in producing hardfacing, cladding and joining wire for open arc, gas shielded or submerged arc welding process.

Our plant is equipped with Automatic powder sieving machine, mixers for wet and dry mixing of carefully control particles size for wire production. Baking oven for powders.

Automatic production line, wire rerolling line, wire drawing machine, wire popping machine, wire spooling machine and vacuum packed.

We produce wires the whole range of ferrous based hardfacing, cladding to your specification and application and we also provide private labeled. The range of application include Build up and buttering, low & medium alloyed for metal to metal wear at low and high temperature, abrasive resistance at low and high impact, work hardening at high impact.

We can produced wire range from 4.0mm down to 1.2mm and packed in 15kgs spool, 25kgs wire basket, 125kgs pop and 250kgs pop.
